

VS-R50D

The Touch Keypad IP Access Controller is built in the VS-R50D, which has a palm-sized and sleek lit touch panel. It features one bi-color led and one beeper for identification, making it easy to operate. Only approved people that are permitted to activate and use the keypad feature in this highly protected system. A single controller unit can manage two access controls. Real-time event log integration is possible.
